

CSO / SSO Outfall Signage

In addition to the ALCOSAN's CSO Flag Program and Sewer Overflow Advisory Key (SOAK), the Authority is increasing public awareness of sewer overflows through the installation of signs at each of the Authority's 259 combined sewer overflow structures and 53 sanitary sewer overflow structures.

Each sign identifies the adjacent ALCOSAN structure and provides notice of the potential for combined or sanitary sewer overflow discharges relative to that structure. Signs will be visible from both the waterway and from publicly accessible land sites and will provide an ALCOSAN hotline number (888-936-9363) for the public to report observed discharges during dry weather.
